Continuation of 11. does NOT place the application in condition for allowance because: "The second instrument that is mountable to the first instrument and that includes a surface that is configured to be placed arthroscopically against a posterior surface of the patella..." With regard the statement of intended use and other functional statements, they do not impose any structural limitations on the claims distinguishable over the Traecy reference which is capable of being used as claimed if one so desires to do so. In re Casey, 152 USPQ 235 (CCPA 1967) and In re Otto, 136 USPQ 458, 459 (CCPA 1963). Furthermore, the law of anticipation does not require that the reference "teach" what the subject patent teaches, but rather it is only necessary that the claims under attack "read on" something in the reference. Kalman v. Kimberly Clark Corp., 218 USPQ 781 (CCPA 1983). Furthermore, the manner in which a device is intended to be employed does not differentiate the claimed apparatus from prior art apparatus satisfying the claimed structural limitations. Ex parte Masham, 2 USPQ2d 1647 (1987).
